50%
QUICKER
TO INSTALL
THAN
LEAD

DAKAFLASH is the new lead free flashing from the people who brought you WAKAFLEX & SMARTFORM. Evo Building Products now has the most comprehensive flashing range in Australia, offering solutions for all applications and price points.

DAKAFLASH incorporates the reinforced honeycomb mesh from WAKAFLEX with the creped, stretchable aluminium top sheet from SMARTFORM. This has created a premium flashing option when reduced project costs are the determining factor in material choice.

DAKAFLASH can be fitted in all traditional installations and retro-fits including abutments, chimneys, step-flashing and Dutch gables.
